

# MONTH-10-MENTAINMENT SYSTEMS

# Next Generation Infotainment

[Quickstart](#)[Docs](#)[Downloads](#)[Dev Client](#)

## NGI Comes Loaded With Features

• Access to 350+ vehicle data signals  
• Touchscreen interface (no phone required)  
• Modern web technologies  
(S/JS)

- Use onboard GPS and navigation data
- Access orientation and accelerometer data
- Respond to driver workload

- Monitor inputs such as steering and acceleration
- Play or stream many audio formats
- Bright and colorful 8 inch diagonal touch

```
m install -g
```

```
i init
```

## Painless Installation

Install a private node module for a setup process that is fast and familiar to anyone working with front-end web development tools. Once you sign up for a developer account and download the source, you'll be ready to go in less than 5 minutes.

MAINTAINING PLANT FOR

► Implemented in NodeJS

▶ Interface ability with vehicle telemetry and systems via their APIs.

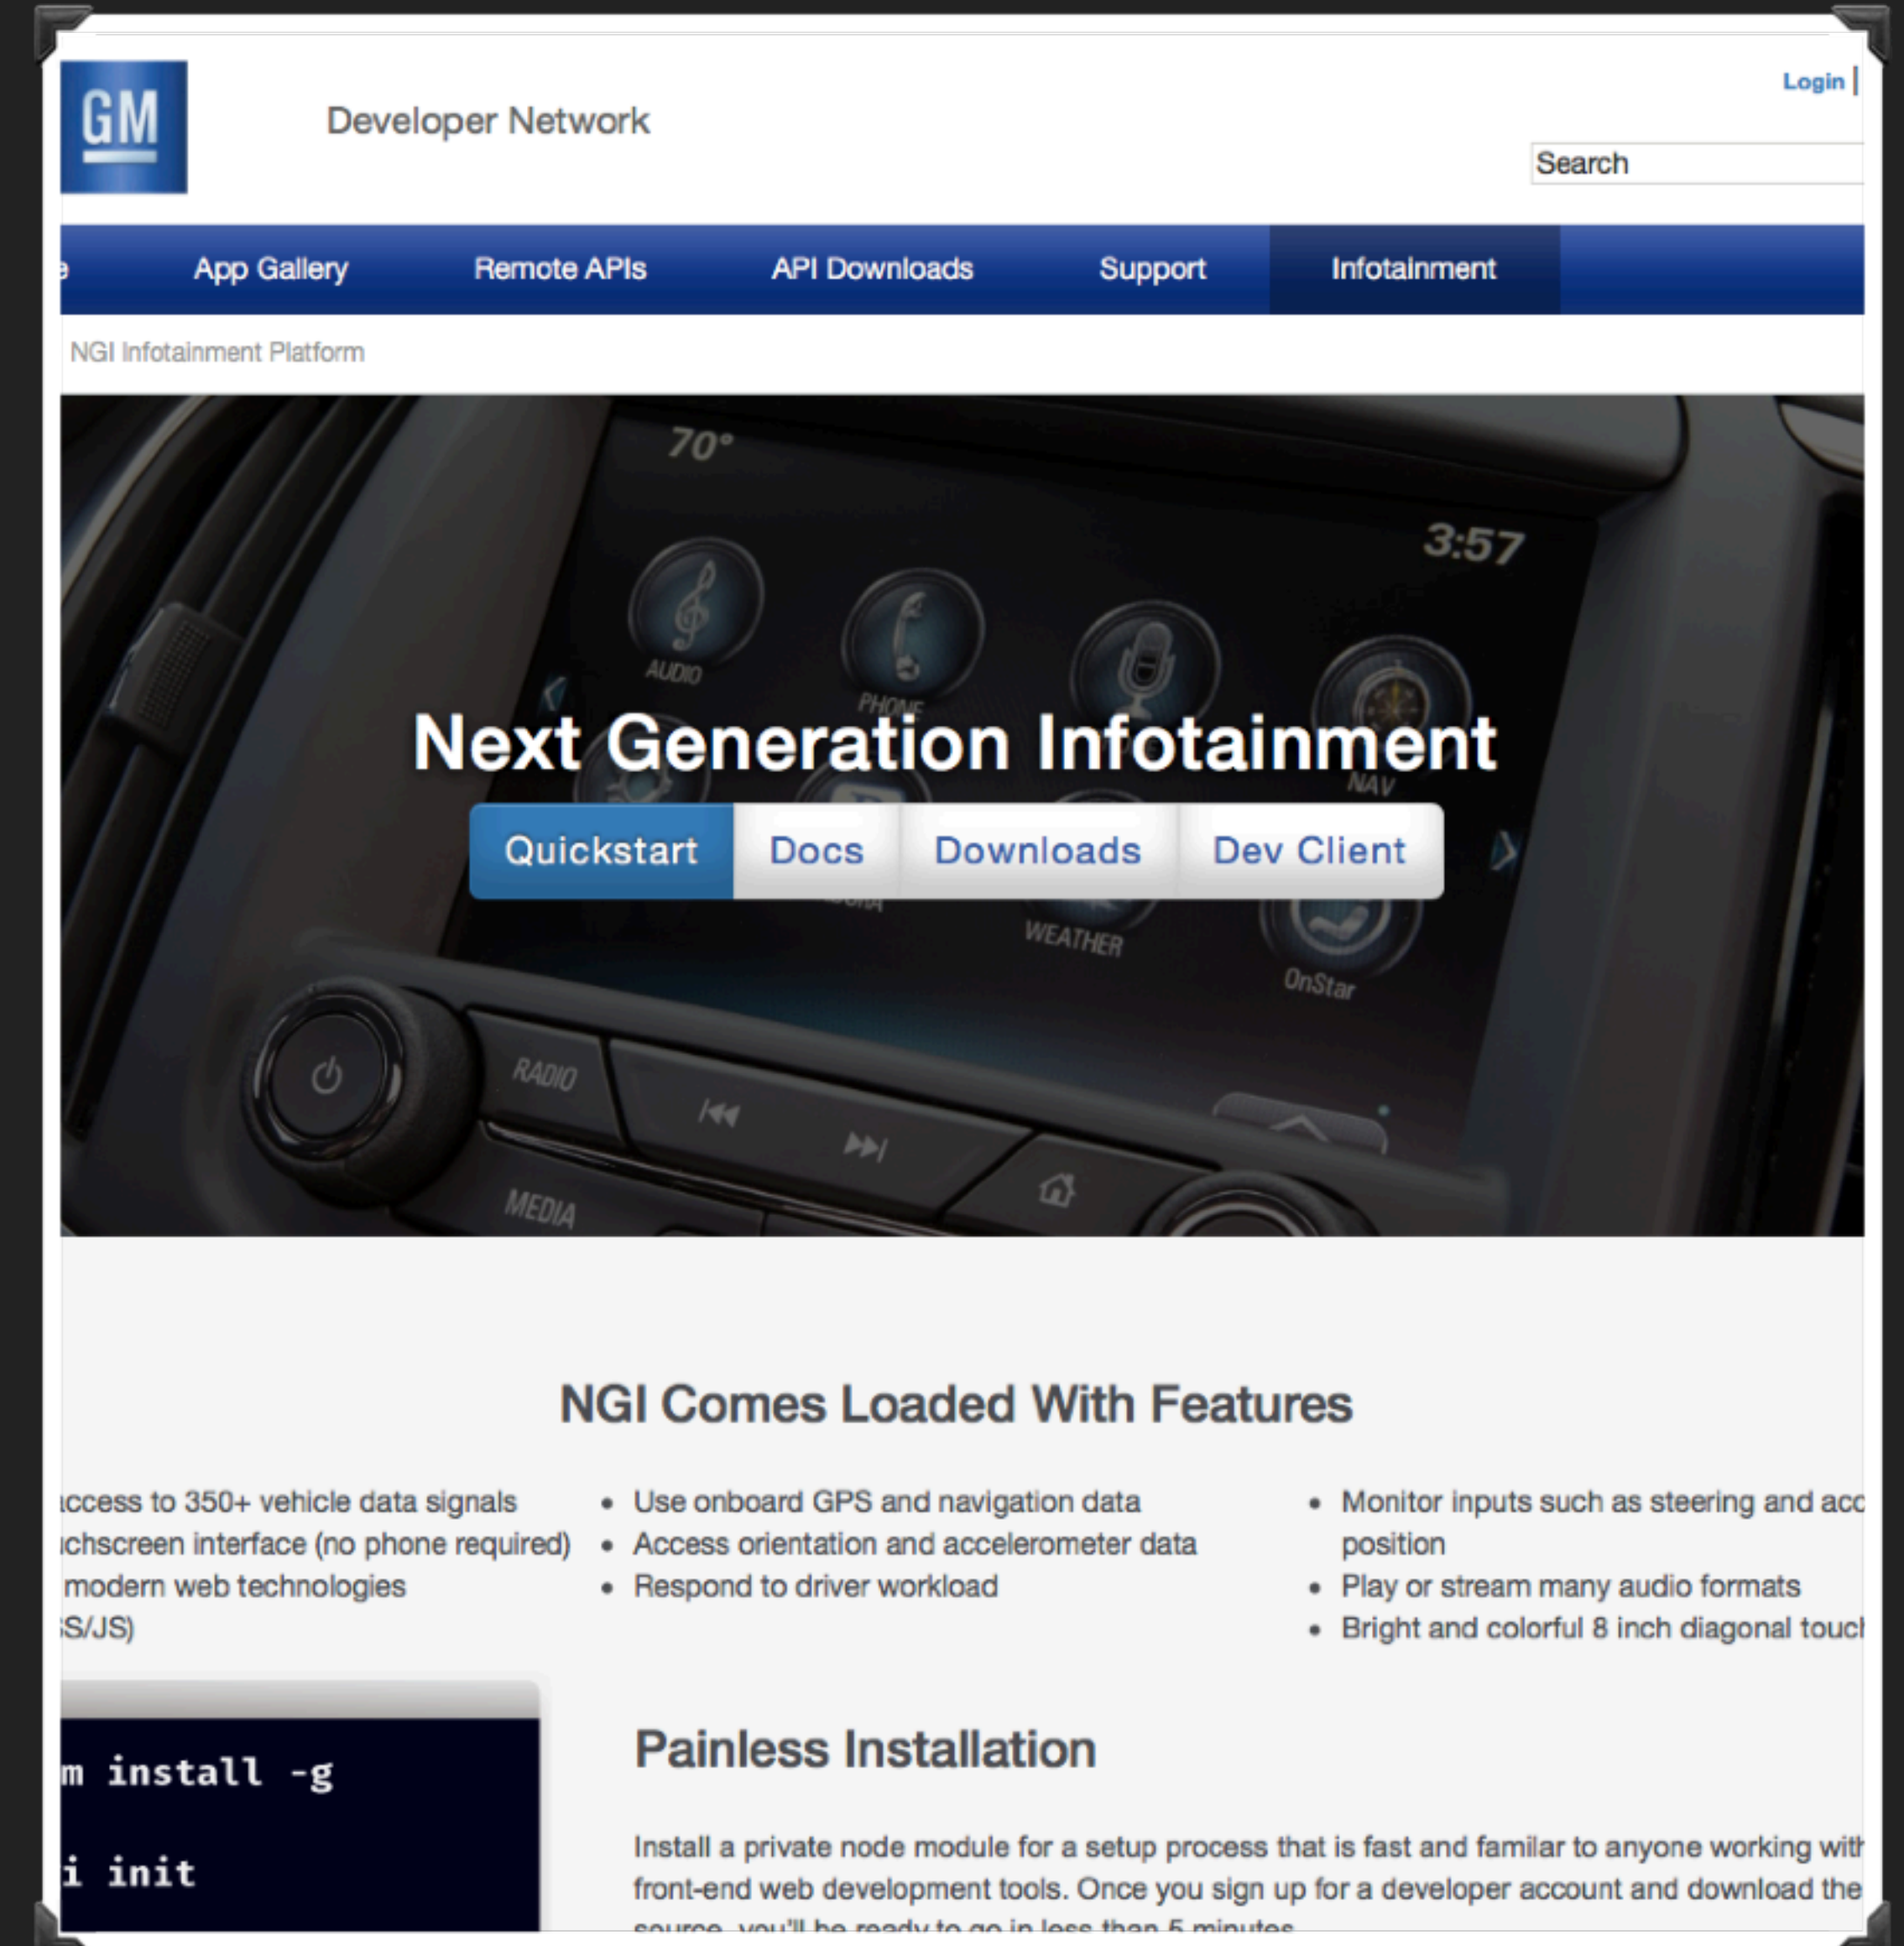

▶ Emulator for rapid development.

► “Dev Client” for in-vehicle testing with real signals and controls.

# NGI INFOTAINMENT PLATFORM

- ▶ Implemented in NodeJS
